

# Getting to know Lightweight DITA

Michael Priestley, IBM / *@ditaguy*

Carlos Evia, Virginia Tech / *@carlosevia*

Oct 9, 2019

## Who are we?

- OASIS Distinguished Contributor
- IBM Senior Technical Staff Member
- Architect of DITA 1.0, Editor of OASIS DITA Specifications 1.0 and 1.1
- Career progression:
  - Technical writer
  - Information architect
  - Tools/standards guy
  - Enterprise content tech strategy
  - Website product owner
  - Marketing taxonomy lead
  - Marketing analytics/information architect

## Who are we?

- Associate Professor of Communication
- Career progression:
  - Journalist
  - Technical writer
  - (Bad) User interface designer
  - PhD in Technical Communication and Rhetoric from Texas Tech University
  - Director of Professional and Technical Writing at VT
  - Author of the book “Creating Intelligent content with Lightweight DITA”
  - Professional Communication curriculum developer

## Who are we?

Co-chairs of the Lightweight DITA subcommittee at OASIS

## What is intelligent content?

*... is designed to be modular, structured, reusable, format free, and semantically rich and, as a consequence, discoverable, reconfigurable, and adaptable.*

## What is DITA?

*The Darwin Information Typing Architecture (DITA) is an XML-based architecture for authoring, producing, and delivering topic-oriented, information-typed content that can be reused and single-sourced in a variety of ways*

## What is Lightweight DITA (LwDITA)?

*A simplified version of DITA, with a smaller element and attribute set, stricter content models, and a reduced feature set.*

## What is Lightweight DITA (LwDITA)?

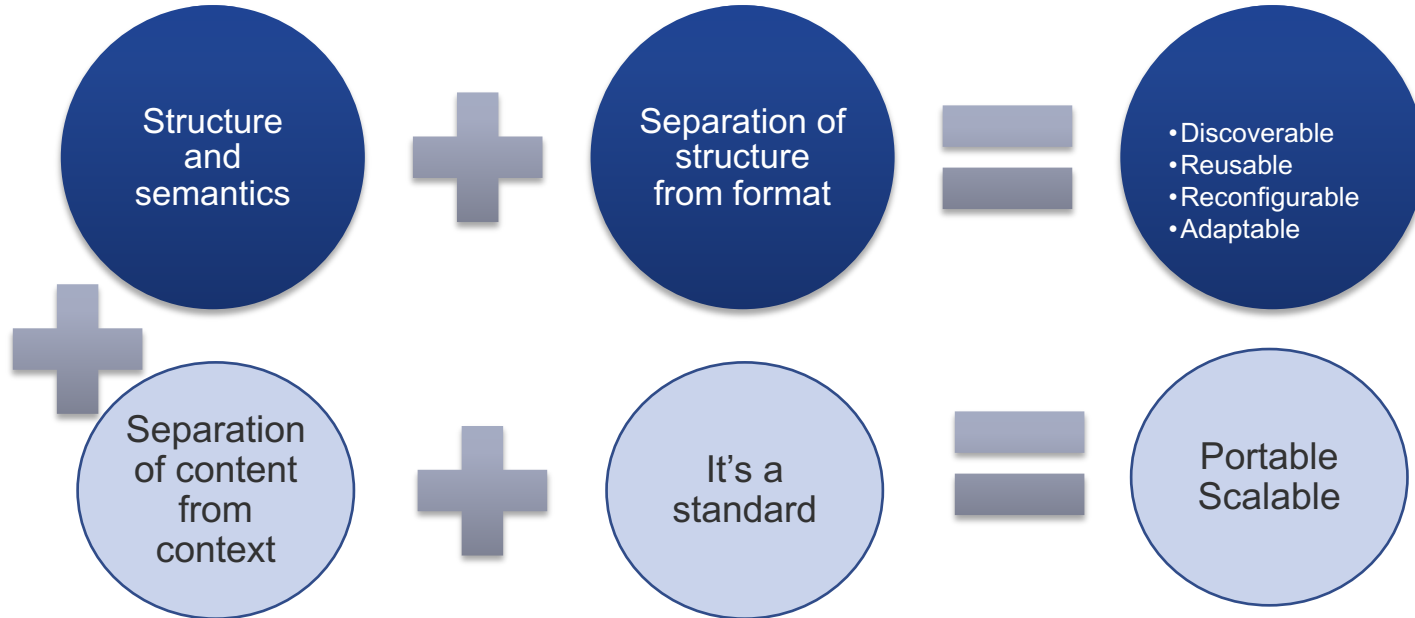

*LwDITA defines mappings between XML, HTML5, and Markdown, enabling authoring, collaboration, and publishing across different markup languages.*

## What's the DITA delta?

What did the intelligent content silo say to the other intelligent content silo?

## If DITA's so great, why isn't everyone using it? (And does LwDITA help)

Adoption barriers	LwDITA approach
Tools you use won't support it – because too complex, or bias against XML, or already implemented proprietary model	Lower cost of supporting it by simplifying standard Map to HTML5 as most common content standard
Authoring community standardized on another format	Bring LwDITA to Markdown, instead of trying to replace/migrate
Seen as too complex/high learning curve	Provide simple starting point, let people grow from there

## What value can LwDITA provide (eventually)?

### Department level

- More tool options
- Standardized entry point
- Start simple, then extend

### Enterprise level

- Collaboration opportunities
- Sharing of tools in ecosystem without one size fits all
- Support end to end customer journey

With great power...

## DITA 1.3 (all-inclusive)

- 26 document types
- 621 element types

## So Lightweight. Such DITA.

### LwDITA

- 2 document types
- 40 element types
  - 33 defined in DITA 1.3
  - 7 expected to be in the multimedia domain for DITA 2.0

## LwDITA Flavors

**XDITA**

**HDITA**

**MDITA**

## XDITA

- Based on a generic DITA XML topic type (**LwDITA 1.0**)
- Limited constraints, but also limited choices
- Allows single-sourcing, reuse, and all that good stuff.

## XDITA example

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE topic PUBLIC "-//OASIS//DTD LIGHTWEIGHT DITA Topic//EN" "lw-
topic.dtd">
<topic id="install-and-setup">
<title>Installing and Setting up Remote Lighting</title>
<shortdesc>Installation of your lighting kit includes installing the
light bulbs into light fixtures</shortdesc>
<body>
<p>The following video demonstrates a recommended installation:</p>
<video><media-controls /><video-poster value="remote-poster.jpg" />
<media-source value="remote.mp4" /></video>
</body>
</topic>
```

## HDITA

- Based on HTML5
- Can be used for format and presentation
- Allows single-sourcing, reuse, and all that good stuff (using HTML5 custom data attributes).

**<!DOCTYPE html>**

## HDITA example

```
<!DOCTYPE html>
<title>Low-Power Networking</title>
<article id="low-power-networking">
<h1>Low-Power Networking</h1>
<p>Network lighting operates at a low level of networking power
but can successfully connect at long distances because they can
send information from light bulb to light bulb.</p>
<p data-conref="disclaimers.dita#osha-disclaim/electrical"></p>
</article>
```

## MDITA

- Based on GitHub-Flavored Markdown
- Does not need tags (core profile)
- Uses HDITA snippets and some Markdown magic for advanced reuse features (extended profile).

## MDITA example

```
# Remote Control Components
```

The remote control has components that allow you to program and operate the light bulbs on your lighting network.

```
## Disclaimer
```

```
<p data-conref="disclaimers.dita#osha-disclaim/electrical"></p>
```

Specialization, anyone?

No more DITA?  
Are we all going Lightweight?

## Which is right for you?

### Full DITA

- Advanced features
- More flexibility
- Mature tooling

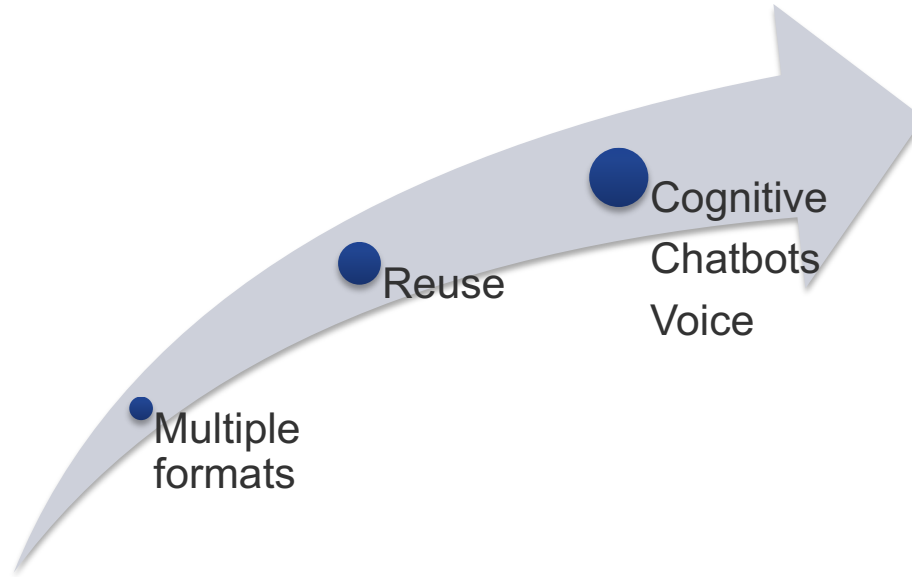

### Lightweight DITA

- Start simple
- More tooling options
- Don't need XML

### Both

- Collaboration across enterprise
- Common tooling components
- Cross-format standard

## Think ahead

# Future friendly

# I want more information!

This is a Non-Standards  
Track Work Product.  
The patent provisions of  
the OASIS IPR Policy do  
not apply.

## Lightweight DITA: An Introduction Version 1.0

Committee Note 02

30 October 2018

This document is part of a work product that also includes:

- ZIP file that contains the DITA source for this document: <http://docs.oasis-open.org/dita/LwDITA/v1.0/cn02/LwDITA-v1.0-cn02.zip>
- ZIP files that contains the grammar files for Lightweight DITA: <http://docs.oasis-open.org/dita/LwDITA/v1.0/cn02/LwDITA-v1.0-cn02-grammar.zip>
- ZIP file that contains sample LwDITA documents: <http://docs.oasis-open.org/dita/LwDITA/v1.0/cn02/LwDITA-v1.0-cn02-samples.zip>

CREATING INTELLIGENT  
CONTENT WITH  
LIGHTWEIGHT DITA

Carlos Evia

## How can you help?

- Reach beyond your silo
  - Talk to marketing, engineering, training, support, sales...
- Represent your requirements
  - Talk to your vendors about cross-silo requirements and standards
  - Talk to your IT department about sharing tools/processes
- Review your options
  - <https://wiki.oasis-open.org/dita/LightweightDITASubcommittee/lwditatools>
- Track our status
  - [https://www.oasis-open.org/committees/tc\\_home.php?wg\\_abbrev=dita-lightweight-dita](https://www.oasis-open.org/committees/tc_home.php?wg_abbrev=dita-lightweight-dita)
  - <https://www.linkedin.com/groups/4943862>
